

Global Customer Agreements, Leading Engineer

Application deadline Continuous job offer

Job description Wärtsilä is a global company, which supports its customers throughout the lifecycle of their installations, providing service, operation and maintenance solutions for the land based power plants. We have more than 15,000 employees in 130 offices and are present in close to 70 countries worldwide.

We provide Global Maintenance and Operation Support services for ships engine room equipment delivered by Wärtsilä, as well as other brands. Within our GCA organisation, you will be part of the global Services organization, with local and regional management. You will work with colleagues in the GCA central office as well as in the global and local Services network, to bring the energy, excellence, and excitement required to build and enhance our business relationships.

As a Leading Engineer in our organisation, you will receive the required training to enable you to work in our truly international environment with unlimited potential for career development. You will take part in interesting challenges that will help advance your professional career, technical knowledge and skills.

In your role, you will lead a service team onboard to carry out planned maintenance work scopes. You are working very closely with the local GCA coordinator and Field Service organization. As the Leading Engineer, you will also closely work with the Chief Engineers onboard and agree on priorities and changes to work scopes, if required. The service teams that you lead are tailored to each individual work scope, and the work done onboard is usually for various equipments/machines.

Responsibilities Preparations for instructed work scopes.
Instruct and lead teams.
Close cooperation with Chief Engineers and local Coordinators.
Ensure Wärtsilä quality standards are applied to all work.
Ensure all required documentation is provided onboard.
Complete and timely reporting and feedback as required.
Responsible for the crew's good perception of GCA services.

Requirements B.S. Degree in Mechanical, Electrical, Project Engineering, Marine Engineering or equivalent experience;
Possibly former seagoing engineer or experienced Service Engineer
Experience with modern 2-stroke engines (Wärtsilä or other brands)
Fluent English language skills.
Experience in team leadership in difficult environments.
Self motivated, initiative, openness, team player
Readiness to have highly flexible working hours

Country Various locations (Singapore, Korea, Hong Kong, Dubai, Spain etc)
